Date: September 4, 2014

**Subject: Blue Aerospace – F-16 Distributorship for Lockheed Martin**

Lockheed Martin is pleased to announce the appointment of Blue Aerospace of Tamarac, Florida as an Authorized F-16 Distributor of Lockheed Martin parts and support equipment. This furthers Lockheed Martin's objective of expanding and enhancing sustainment support to F-16 operators and maintainers.

Lockheed Martin and Blue Aerospace will work together to identify and solve F-16 sustainment challenges using proven methodologies including the advance provisioning of spares, tailored solutions, inventorying of repair details, dedicated technical initiatives and other innovative processes and investments.

As a Lockheed Martin F-16 distributor, Blue will use only Lockheed Martin approved suppliers and manufacturers, all of whom operate within the strict quality guidelines of Lockheed Martin Aeronautics and use Lockheed Martin-approved technical data.

We are excited to add Blue to our F-16 support network to help meet the sustainment requirements of the F-16 community.

Sincerely,

A handwritten signature in black ink, appearing to read "Drew Ruiz", with a long, sweeping flourish extending to the right.
