

Airborne Firefighting Systems

Manufacturing & Sustainment Service

Global aftermarket service and support leaders Blue Aerospace and United Aeronautical are proud to announce asset management and distribution of C-130 MAFFS II System.

MAFFS II, designed in coordination with the US Forest Service and Lockheed Martin, is proven in operation with the US Air Force and is the most capable and most sophisticated and effective aerial firefighting system available.

MOBILE, PROVEN, READY

Modular Airborne Firefighting System

MAFFS II
