

# UALS

## Universal Ammunition Loading System

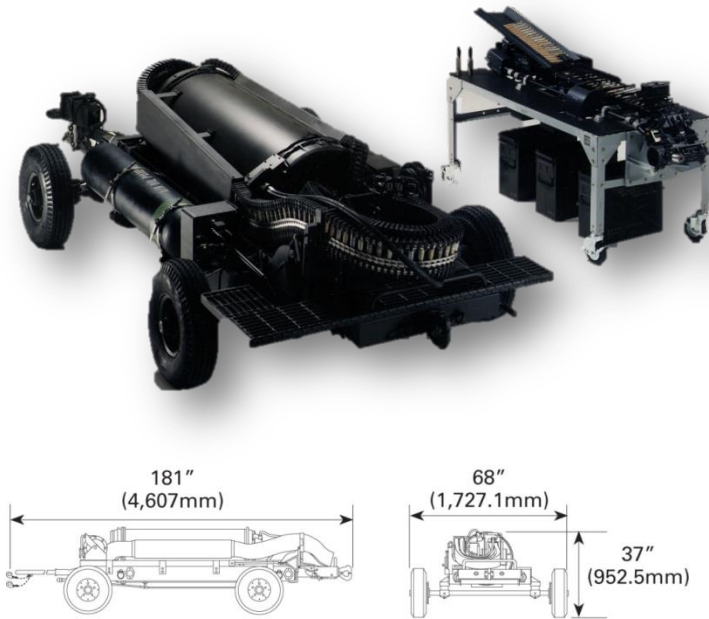

Blue Aerospace is pleased to offer UALS produced by General Dynamics Ordnance and Tactical Systems.

UALS significantly reduces the time and manpower required to load all U.S. Air Force, Navy, and NATO aircraft equipped with internal M61A1 / M61A2 gun systems.

Blue Aerospace is GDOTS's licensed Global Sustainment Partner of M61 Gun System & UALS worldwide.

*Manufactured by.....* **GENERAL DYNAMICS**  
Ordnance and Tactical Systems

The UALS's 2100 round capacity loads either four F-16, two F-15, or three F/A-18 aircraft before it must be replenished.

# UALS

## Universal Ammunition Loading System

UALS consist of two sub systems: a loader and a replenisher unit. The UALS loader transfers ammunition into the aircraft's weapon system. External drive power is supplied by a GFE manual hand crank or by a self contained pneumatic supply carried on the UALS. The pneumatic air cylinders can load up to three full UALS complements. A UALS replenisher is capable of accepting 20mm loose or linked ammunition while simultaneously receiving and sorting spent cases and unfired rounds. It also strips ammunition tubes.
