

Cartridge Actuated Cutter

Manufactured by.....

COBHAM

Blue Aerospace, a supply chain management expert company, is pleased to offer stocking distribution of Cartridge Actuated Cutter (CAC) manufactured by Cobham for operators worldwide.

CAC punctures a hole into an aircrew member's oxygen hose, providing an open air passage to an unconscious or incapacitated crew member. The CAC provides the same critical life saving benefits as Cobham's Water Activated Mask Release (WAMR). These critical life saving devices actuate once the aircrew member has resurfaced from a water landing.

US Designation
CAC

Part Number
1814-021-01

NSN
1377-01-492-4305

Features

- ✓ Automatically operated - Activated within 5 seconds after removal from water.
- ✓ State of the art electronics - Will not operate when exposed to external environments including rain, humidity, and salt fog.
- ✓ Device circuitry is completely inactive prior to immersion.
- ✓ The system is a self-contained unit requiring no scheduled or preventative maintenance.
- ✓ Successfully passed qualification for installation U. S. Navy and U.S Air Force aircraft.
- ✓ Service life of 5 years.
