**KC-130J Hose & Reel Assembly**  
PN: 149R1050-110 / NSN: 1680-01-626-8698

**KC-130 "legacy" Hose & Reel Assembly**  
PN: 149R1060-1 / NSN: 1680-01-023-3165

(can be upgraded to the -110 configuration)

## Benefits of the Upgraded -110 (C-130J) System:

- ✓ **SAFETY!** - additional circuitry protects all aircraft in case of in-flight failure
- ✓ Improved reliability, reduced maintenance and ownership costs
- ✓ Hour & cycle counter tracks hose usage and aids in scheduling inspections
- ✓ Simplifies reel adjustment and attachment of test equipment
- ✓ Eliminates premature wear of fuel seals
- ✓ Includes the “Emergency Trail” mode upgrade

### HOUR & HOSE CYCLE COUNTER

- Addition of a counter to track hours of operation; used for scheduled maintenance and periodic inspection intervals
- Allows tracking of refueling hose “in-service life” based on hose wear from operational cycles

### DRUM LATCH & MOTOR

- Maintenance friendly hose reel now includes an electrical circuit to unlock the hose drum
- Drum motor now includes a mode to permit extension of the refueling hose during a hydraulic system failure (the “Emergency Trail” mode)
