

CHAFF / FLARE

COUNTERMEASURES

Manufactured by.....

Blue Aerospace is proud to partner with Armtec Defense Technologies, industry leader in manufacture of expendable flare and chaff countermeasures, to commercially provide a full range of countermeasure solutions.

Armtec's commercial products are held to the same high quality standards as products manufactured for the U.S. military. Our high-capacity production lines minimize schedule lead time for your flare and chaff needs.

Armtec chaff / flare are commonly operated from wide range of fixed and rotor wing including F-16, P-3, C-130, F-15, H-60 and many others.

Radars Chaff & IR Flare Countermeasures

Infrared Decoy Flares

Infrared (IR) decoy flares are dispensed from aircraft to provide protection from heat-seeking missiles. We produce a wide assortment of flares to suit a variety of applications for the U.S. Army, Navy, Air Force and allied governments. In addition to standard U.S. inventory flares, we also offer a complete line of high performing ARM series flares tailored to address the needs of unique operational environments and meet specific user requirements.

Radar Countermeasure Chaff

Radar countermeasure chaff is designed to decoy Radars and/or Radar-guided missiles. Our chaff products offer broad-frequency coverage, high Radar reflectivity, and minimal bird-nesting. Armtec chaff is available in S-band thru Ka-band and can be tailored to meet specific customer requirements.
